ICE SERVICE GROUP, Inc. (ICE) RECEIVES REGISTRATION TO SHIP and TRANSPORT LOW LEVEL RADIOACTIVE WASTE (LLRW) BY THE TEXAS DEPARTMENT OF STATE HEALTH SERVICES (TXDSHS)

Pittsburgh, Pennsylvania; ICE Service Group, Inc. (ICE) becomes one of the few companies authorized to both ship (broker) and transport Low Level Radioactive Waste (LLRW) to the Texas LLRW Disposal Facility.

The registration allows ICE to broker LLRW for disposal / disposition as well as transport LLRW material either by *rail or truck* into the Texas LLRW Disposal Facility (Waste Control Specialists) in Andrews, Texas. This registration gives ICE the opportunity to expand their waste management and transportation services to both commercial and government customers across North America, which have a need to safely & economically package, transport and dispose of their LLRW.

ABOUT ICE SERVICE GROUP, INC.

ICE provides the safe and economically packaging, transportation via rail, truck and marine and management of hazardous materials, hazardous waste, low level radioactive waste, non-hazardous waste, over-dimensional equipment / machinery and other commodities across North America. ICE senior staff members have managed over 13,000,000 million tons of material safely and economically. All work performed by ICE is performed under their Nuclear Quality Assurance (NQA-1) Program. ICE is a small business with offices in PA, NJ, VA and TX.
